SIMPLIFIED NETWORK CONTROL.  
ENDLESS LIGHTING. 

# SPECTRUM SERIES

The Spectrum Series is a cutting-edge family of wirelessly controlled fixtures that are both wattage adjustable and Tunable White. Commissioning, grouping, and adding Konex sensors and switches is a breeze using the ESL Spectrum App. Spectrum offers an incredible kelvin range of 2700K–6500K, ensuring that end users will have their preferred light output on every project. The embedded TAP technology, included with each Spectrum fixture, allows stocking distributors to minimize their inventory while capturing lost revenue. Best of all, Spectrum is future proof.

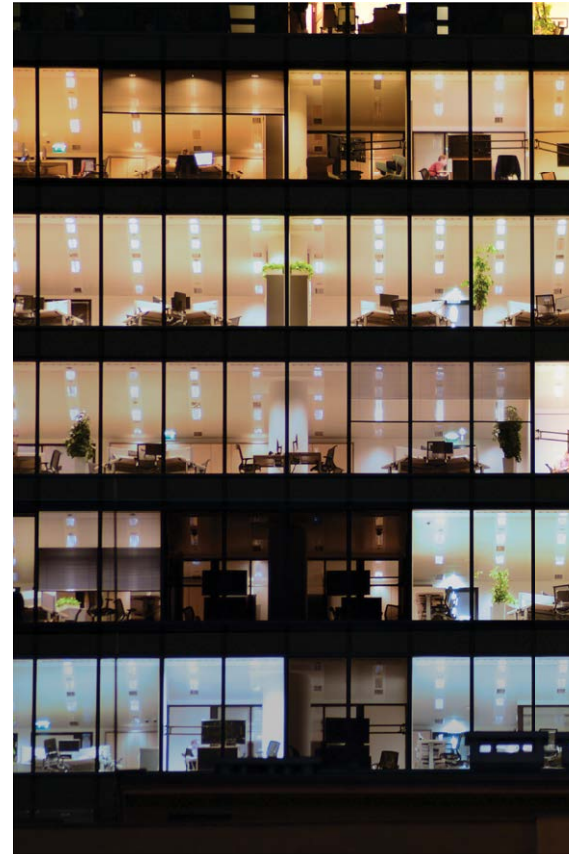

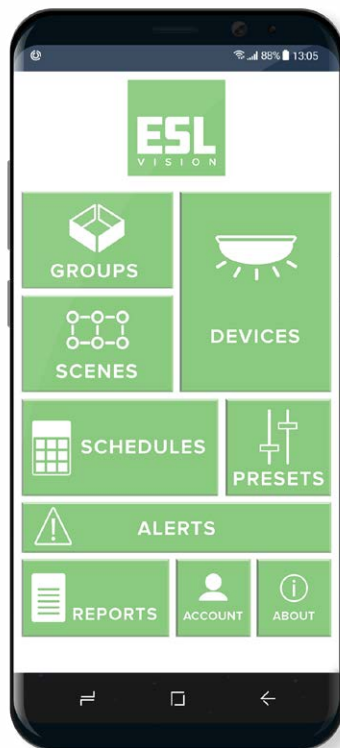

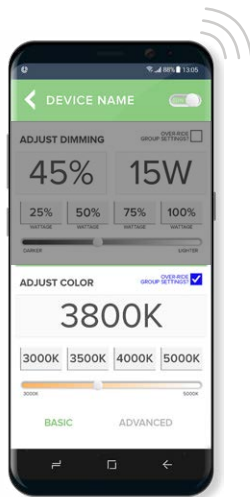

## ADJUSTABLE WATTAGE

Calculating the correct LED wattage to meet foot candle requirements can sometimes be a tricky process. Miscalculations can lead to replacing the fixtures or installing dimmer switches. The Spectrum Series offers a range of wattage settings which allows the adjustment of a single or group of fixtures to meet the exact requirements of a facility. When requirements change, simply modify the settings wirelessly.

# TUNABLE WHITE

Utilizing the Spectrum App, end users can wirelessly adjust the kelvin output of a single fixture, or a group of fixtures, from 2700K to 6500K to meet the requirements of any application.

The ESL Vision Controller App will be available on:

\*will be available soon on the Apple App Store

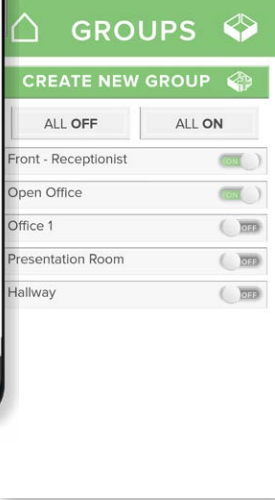

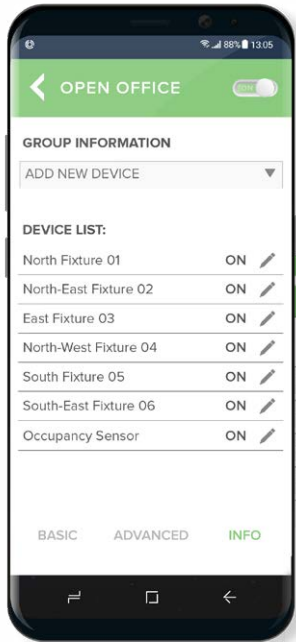

## Capabilities of Spectrum with Konex

- Tunable White
- Wattage Adjustable
- Mesh Grouping
- Controls Capable:
  - Sensors
  - Wall Switches
  - 0-10v - Dim to Off
  - DLC Premium (pending)
  - DLC Network Lighting Controls (pending)

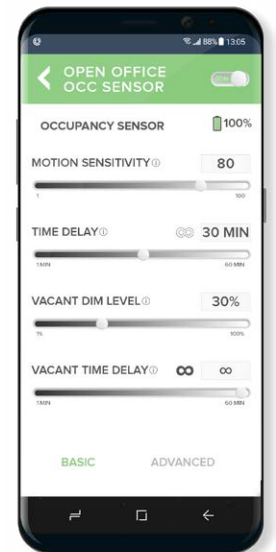

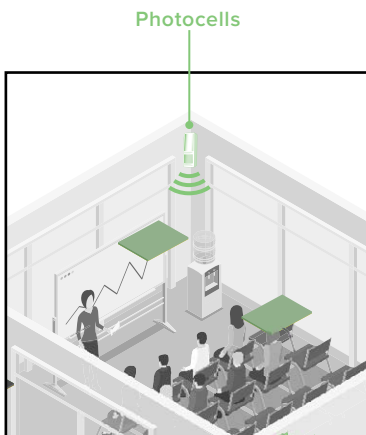

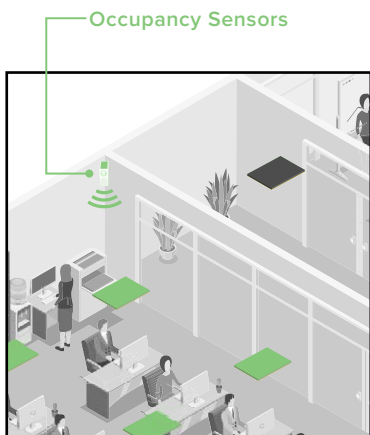

Konex is a family of maintenance-free occupancy sensors, photocells and switches that are code compliant and maximize energy savings. Operate a single fixture or a group of fixtures wirelessly using the ESL Vision App. All Spectrum Series fixtures have Konex capabilities built in, to ensure that your lighting system will work seamlessly.

Group Fixtures for Easy Control of Rooms or Large Areas

Wirelessly Connect Optional Occupancy Sensors, Photocells and Switches for Complete Network Control

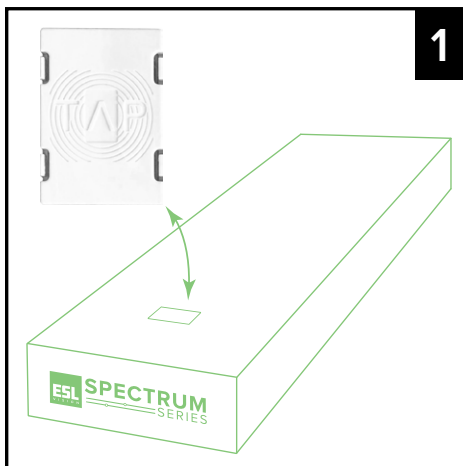

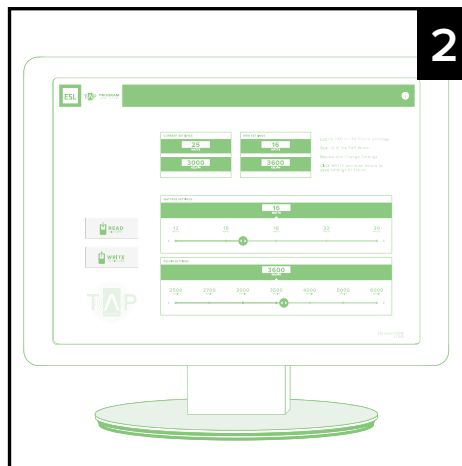

TAP Technology is the patent-pending solution to increasing every distributor's inventory offering without using additional warehouse space or increasing overhead. With TAP, a Spectrum Fixture is easily set to any desired Kelvin or Wattage instantly; right at the point of sale. No more lost sales, because with Spectrum and TAP Technology "it's always in stock".

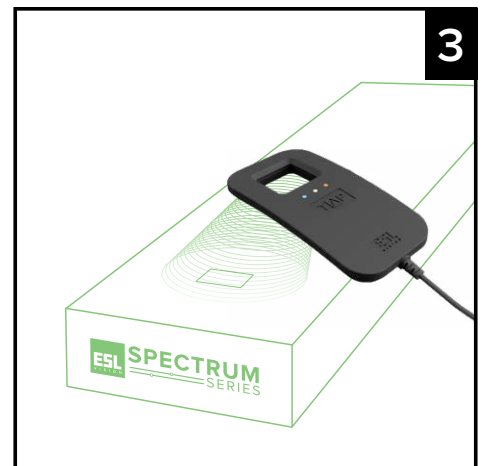

Handheld TAP Scanner

Locate the active TAP scan icon on the package. Scan the fixture in using Handheld TAP scanner to READ in the fixture.

SET new specifications for Wattage and Kelvin

Using the Handheld TAP scanner, WRITE the new specifications to the fixture.
