

• **DESIGN** - LED STRIPLIGHT FIXTURE WITH Q-BASE has a narrow, low-profile design. Durable commercial grade housing resistant to rust and impact along with an anti-glare PMMA lens provide many years of use. It is designed to operate on 120-277V or 277-480V circuits with a 0-10V dimmable driver.

SENSOR BASE - The fixture has a built-in motion sensor base, allowing you to install the microwave motion sensor, which will turn off the fixture automatically when no motion is detected.

BATTERY BACK-UP - The built-in battery back-up provide 90 minutes of power in case of emergency.

COLOR AND POWER SELECTABLE - You can choose either a 3,500K neutral white, 4,000K cool white or 5,000K daylight color temperature, and change the power with a simple switch.

APPLICATION - Perfect commercial or industrial solution for office buildings, schools, hospitals, hallways, stairwells, workshops, and many other applications. It is also Damp Locations rated.

ADVANTAGES - With calculated lifespan up to 156,000 hours, these fixtures are made to last decades under normal operation! ASD provides a 5-year limited warranty along with UL and DLC Standard certifications to guarantee top quality products and safety!

### **BUILT-IN BACK-UP BATTERY INFORMATION**

Model	Battery watts	Lumens in emergency mode	Batt capa		Emergency mode	Charging time
ASD-LSF7A-4A40-EM	10W	1,794 lm	2,000	mAh	≥ 90 min	≥ 24 hours
ASD-LSF7A-8A90-EM	15W	2,572 lm	2,000	mAh	≥ 90 min	≥ 24 hours
Test switch		Emergency mode			Charging or re	charging
OFF		OFF				

1. Indicator light is ON: Battery back-up fully charged or recharging and device is using circuit power.

2. Indicator light is OFF: Device is using battery back-up power.

3. To test the battery back-up press the test switch one time. To turn off the emergency power state press test switch one more time

### MOTION SENSOR INFORMATION

REMOTE C	REMOTE CONTROL ASD-06RC sold separately:									
	Button		Remarks	Button		Remarks	Button		Remarks	
· · ·	ON/OFF	ON/OFF	Turn the sensor ON/OFF.	мн	Mounting height	Adjust detection area/sensitivity levels according to real installation situations, higher or lower.	*	Up	The main functional buttons to adjust the factors to desired level.	
COx 0 50%  K 2 700%  M 0***  Ox	Auto	Auto	Enter "sensor mode" and perform previous settings.	Send	Send	Memorize and send out the previous setting of individual parameters.	÷	Down	Press + - button to dim light directly in non-detection mode.	
AM (0H <sup>2</sup> * 2) + 3% 5C-5) 5K-65 (2) (2) 12(P (2) hus 200078 (Auto Renet)	Reset	Reset	Enter "sensor mode" and perform the default settings.	(W)	Detection range	Also known as "sensitivity", 100 % means the highest sensitivity and longest distance. Use this button and the + - buttons to adjust.	ССТ	CCT Selectable	Not applicable to this product.	
Screek Start Merrory Appr M.H. Serd	Scenes	Scenes	Shows current settings saved in remote.	۲	Daylight sensor	The preset lux level at which motion will be detected. Use this button and the ${\rm +}$ - buttons to adjust.	POWER	Power	Adjust brightness in both ON/OFF mode & sensor mode, minimum 10%, max 100%, each time this button is pressed it changes by 5%.	
· • •	Start	Start	Press this to begin scene setup.		Stand-by dimming	After hold time, the light will dim from 100 % to optional standby dimming levels. Use this button and the + - buttons to adjust.	$\bigcirc$	Reserved Button	Not applicable to this product.	
CCT V POWER	Memory	Memory	Saves the scene settings.		Hold time	The period that light will stay illuminated 100 $\%$ after no motion is detected. Use this button and the + - buttons to adjust.		Daylight Harvesting	Daylight harvesting function enabled or disabled.	
	Арру	Apply	Applies current scene settings to the fixture.		Stand-by period	The period after holdtime, during which the light keeps standby dimming level. Use this button and the $\rm +$ - buttons to adjust.	Test	Test button	Press this button to test the sensor; it will temporarily change the hold time to 2s. This setting cannot be saved.

ASD-06RC

 Microwaves can penetrate walls or glass thinner than 0.8" but will be impaired if thicker than 0.8".
 The driver voltage shall be stable and float within 10 %. 3. Detection area will be affected by speed of motion, mounting height and movement volume.
 4. Conduct testing with adequate ambient lighting for best results.
 5. Dimming performance differs when connected to different drivers; If the driver can't completely turn

Specifications	
Operating voltage	10-15 Vdc
Operating current	≥ 40mA
Working mode	0-10 V
Detection area	25 %/50 %/75 %/100 %
Hold time	Remote control: 5 s/30 s/1 min/2 min/3 min/5 min/10 min/15min/ 20 min/25 min/30 min/45 min/60 min/90 min/120 min
Daylight threshold	2 lux (0.2 fc)/10 lux (0.9 fc)/30 lux (2.8 fc)/50 lux (4.7 fc)/ 80 lux (7.4 fc)/120 lux (11.2 fc)/200 lux (18.6 fc)/250 lux (23.2 fc)/ 300 lux (27.9 fc)/350 lux (32.5 fc)/400 lux (37.2 fc)/disable
Standby period	0 s/5 s/30 s/1 min/2 min/3 min/5 min/10 min/15 min/20 min/ 25 min/30 min/45 min/60 min/+ $\infty$
Standby dimming level	Remote control: 10 %/20 %/30 %/50 %
Operating temperature	- 13°F to 140°F (-25°C to 60°C)
Mounting height	max 13.1 ft (4 m)
Detection range	> 65 ft (20 m)
Operating frequency	5.8 GHz ± 75 MHz
Microwave power	< 0.3 mW
IP rating	IP20

### **DEFAULT SETTING:**

Specifications	
Detection area	100 %
Hold time	10 min
Daylight threshold	Disable
Stand-by period	0 s
Stand-by dimming level	10 %

RF interference may affect the operation of this sensor

Make sure the microwave module is completely exposed. Make sure the microwave module is completely expused.
 The detection surface of the sensor module should be installed facing the detection area

#### Application environment:

it nets more sensitive

OFF, sensor can't either.

Installation precautions:

User notes:

Suitable for indoor application, half/completely outdoor environment conditions might trigger the

6. The first time powered ON sensor, light will be ON 100% for about 10S then dims to standby level or OFF.

1. Suitable for ceiling mount installation, adjust sensitivity properly if it's installed on side-wall because

 Shall be mounted securely, to avoid any false triggers caused by movement of the fixture itself.
 Keep the sensor module away from AC input and DC output to avoid high/low frequency signal interference

For most up-to-date spec sheets please refer to asd-lighting.com

(U)

#### WITH DUSK/DAWN FUNCTION:

1. With insufficient ambient brightness, sensor turns on light and keeps it at standby dimming level even if there is no motion or presence.

2. When sensor detects motion or presence it will bring the light level up to 100 %.

3. After motion is no longer detected, fixture remains at 100% for hold time.

4. After pre-set hold time period it will dim to standby dimming level again and always keep it.

5. With sufficient ambient brightness, sensor will turn OFF light automatically.

#### WITH DAYLIGHT DISABLED:

1. Sensor turns ON light when motion is detected.

2. Light will stay on after detecting motion for the desired hold time.

**3.** Sensor dims light to standby dimming level after hold time if there is still no motion.

4. Sensor turns OFF light after standby period.

#### WITH DAYLIGHT THRESHOLD:

1. With sufficient daylight, the light remains OFF even after motion is detected.

2. With insufficient daylight, the sensor turns light ON when motion is detected.

3. After there's no motion detected, the sensor keeps light ON 100 % for holdtime.

4. After holdtime, sensor dims light to standby dimming level for standby period. If the standby period has been set as Os, sensor turns light OFF automatically after holdtime.

 ${\bf 5}.$  The sensor turns OFF light automatically after the standby period when there's no motion detected.

#### DAYLIGHT HARVESTING:

1. When ambient brightness is lower than preset lux level, sensor will turn on light automatically and keep dimming according to the change of the ambient brightness. As it gets darker outside the fixtures will brighten, and as it gets brighter outside the fixtures will dim down.

 $\mathbf{2}.$  When the ambient brightness exceeds the preset lux level, the light will turn OFF.

To avoid blocking the microwave emission, the microwave sensor can not be covered with metal materials, be sprayed with a coating of metal components, or have attached metal material or stickers etc.

The distance between the antenna and the glass (dielectric material) should be no less than 0.4 ft when the sensor is within the glass lampshade. Otherwise, the microwave motion sensor will not penetrate the glass easily.

Avoid placing the sensor inside a metal chamber, this may cause a mis-trigger.

The sensor should not be placed in a small confined space. To avoid increasing the sensor detection range or abnormal operation, the sensor should be kept away from large areas of metal and glass reflectors (separation distance at least 3.3 ft). Reduce the detection area setting

To avoid affecting the microwave signal transmission, the microwave antenna should be higher than the surrounding metal surface.

Any vibration or movement may trigger the sensor. Ensure the sensor is far from any constant movement.

There must be at least 6.5ft between microwave sensors; There must be at least 4.9ft between the sensor and other wireless devices such as routers to avoid possible radio interference.

#### DAYLIGHT HARVESTING SETTING:

 Adjust "daylight" value higher than 50lux.
 Preset "standby period" 0S.
 Press "daylight harvesting" button on remote control to activate.

## INSTALLATION GUIDE

#### IMPORTANT SAFETY INFORMATION:

Please read all the instructions below before installation.

- Make sure that the supply voltage corresponds to the rated product voltage
- The product must be installed by a qualified electrician in accordance with the National Electrical Code and corresponding local codes.
- If the product is damaged, do not use it.

### A WARNING

#### Risk of personal injury - read and follow all warnings and installation instructions. Keep or give to the owner for future reference.

Risk of cuts: Wear gloves to prevent cuts or abrasions when removing from carton, handling, installing, and maintaining this product.

Risk of electric shock: This product must be installed in accordance with the applicable installation code by a person familiar with the construction and operation of the product and the hazards involved.

Risk of Fire: Minimum 194°F supply conductors. Consult a qualified electrician to ensure correct branch circuit conductor.

ASD® assumes no responsibility for claims arising out of improper or careless Installation or handling of this product.

### SURFACE MOUNT INSTALLATION:

1. Secure the baffle onto the back of the fixture with screws

 Open the fixture by pressing the area between the narrow rectangular hole and snap-lock. Connect the wires: Black to Black, White to White, Green to Green
 Secure the luminaire to the ceiling with the plastic anchors and screws (not included). Assemble lighting fixture.

\*2 ft models are suitable for installation in the storage area of a clothes closet.

#### CHAIN MOUNT INSTALLATION:

1. Connect the V-hook to back of the fixture body, after insert chain on each hook. Attach the chain to the ceiling and adjust until balanced and secure. Secure the end of metal hose to the outlet hole. Open the fixture body and connect the wires: Black to Black, White to White, Green to Green.

3. Assemble the fixture back to complete the installation

#### POWER AND COLOR TEMPERATURE SETTINGS:

#### ELECTRICAL SCHEMATIC DIAGRAM:

#### LSF7A-EM with motion sensor and battery back-up

#### LSF7A multiple fixture connection

Recommended wire thickness should not exceed 18AWG

#### WIRE GUARD INSTALLATION ASD-WG4-LSF7 sold separately:

- Install the wire guard to the fixture.
  Insert the provided chips (4pcs) onto the wire guard.

3. Fasten the chips by drilling screws into the pre-punched holes of fixture body.

#### CONNECTING MULTIPLE FIXTURES ASD-CB-LSF5 sold separately:

1. Open the fixture and remove the knockout on the side of the fixture according to your needs. Feed the wires through the knockout hole and connect with fixture wires inside of the luminaire. If 0-10v dimming system is available, connect the purple and gray wires to the corresponding purple and gray wires in the built-in dimming system.

CAUTION: Customer supplied AC wire must be 16AWG.

2. If need to connect one fixture to another please use connection bracket (sold separately). Repeat the process for the next fixture.

For most up-to-date spec sheets please refer to asd-lighting.com

### MOTION SENSOR INSTALLATION

ASD-08MW-WH sold separately:

1. Open the fixture by pressing the area between the narrow rectangular hole and snap-lock. Remove the protection plate from the board and protection cap from the sensor base.

2. Secure the sensor to the audio jack sensor base inside of the fixture.
